EDUCATION

Northeastern University

Master of Science in Computer Software Engineering

Boston, MA

Aug. 2024 – Expected May 2026

Savitribai Phule Pune University

Bachelor in Computer Science

Pune, MH

Aug. 2020 – Jun 2023

EXPERIENCE

Software Engineer Intern

Humanitarians AI

Feb 2026 – Apr 2026

Boston, MA

- Architected a RESTful API gateway using Node.js and Express to unify 50+ fragmented content creation tools, reducing workflow completion time by 65% across 120+ concurrent users.
- Designed a multi-tenant RESTful routing layer using Express and Supabase with JWT authentication and row-level security policies, eliminating unauthorized data access across 500+ user records and 100+ concurrent sessions.
- Engineered parallel request execution layer using Promise.all and async/await in Node.js to replace slow sequential API calls, reducing end-to-end response latency by 83% from 18s to 3s across 50+ tool backends.
- Containerized and deployed API gateway using Docker and GitHub Actions CI/CD pipeline, eliminating manual deployment errors and reducing release effort by 40% across 3 environments.

Software Development Engineer

MR SON Equipments Pvt Ltd

Jul 2023 – Jun 2024

Pune, India

- Built an inventory management REST API using Spring Boot and MySQL, supporting 300+ SKUs with stock tracking, barcode lookup and low-stock alerts, reducing manual tracking effort by 30%
- Developed a customer order tracking module using Spring Boot, Hibernate ORM and Redis, optimizing 7+ SQL queries with indexed lookups and caching, reducing retrieval time by 40% across 500+ orders.
- Secured internal ERP service endpoints using Spring Security, JWT authentication, input validation and rate limiting, enforcing RBAC across 3 user roles and eliminating unauthorized access risks across all service endpoints.
- Accelerated release cycles using Docker, Git and Agile/Scrum, writing unit and integration tests across 10+ critical service paths with a team of 3 engineers, improving release predictability by 25%.

PROJECTS

CookNest | Java, Spring Boot, React, Hibernate, MySQL, Docker, AWS S3

- Developed a full-stack recipe platform using Spring Boot and MySQL, securing 15+ REST API endpoints with JWT-based RBAC across 2 access tiers, supporting 200+ records with scalable paginated feed
- Engineered a MySQL database layer with normalized schemas, composite indexes and Hibernate ORM joins using MVC and DAO architecture, reducing query load by 65% and achieving sub-300ms response times

Document Parser | Python, FastAPI, Supabase, OpenAI API, FAISS

- Built a RAG pipeline using Python, OpenAI API and FAISS, enabling document-grounded Q&A across PDF, DOCX, TXT and CSV with sliding window chunking, achieving 90% answer relevance across 10+ documents.
- Engineered a FAISS-based contextual retrieval fallback using custom logic and FastAPI to eliminate out-of-context responses, surfacing semantically adjacent sentences and reducing hallucinations by 60%.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, HTML, CSS

Backend: Spring Boot, Node.js, Express.js, Hibernate ORM, REST APIs, OAuth, GraphQL

Databases: MySQL, PostgreSQL, MongoDB, Supabase, Redis

Cloud and DevOps: Git, Docker, GitHub Actions, CI/CD, Postman, Jira

AI and ML: OpenAI API, FAISS, RAG, LLM, Supabase Vector Store

Testing: JUnit, Unit Testing, Integration Testing
